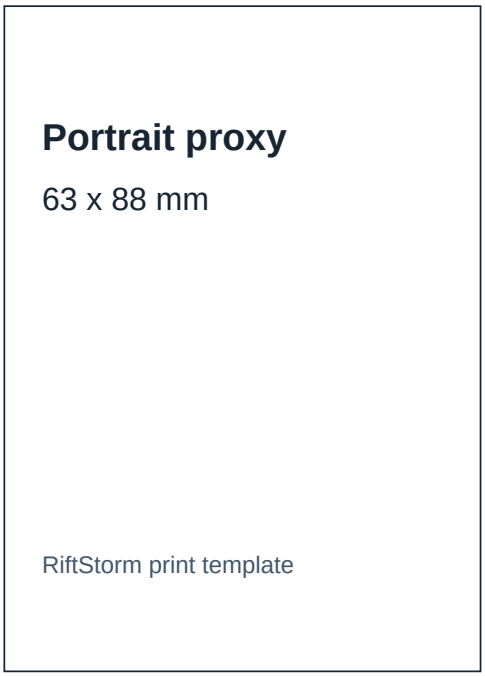
RIFTSTORM.GG

Proxy print calibration

US Letter / 8.5 x 11 in | Print at Actual size (100%).

Use a metric ruler. Measure between the centers of the two end marks.

Horizontal test line / 100 mm



Vertical test line

100 mm

Check your result

Both lines should measure 100 mm. The portrait outline should measure 63 x 88 mm.

If the two lines differ, check paper selection and printer settings before changing scale.

If both are off by the same amount, enter the measured length in the scale calculator.
